ABOUT ME

I am a 17-year-old self-driven student passionate about ethical hacking, software development, and gaming. My journey into cybersecurity and programming began in 2021 through InCTFj, and since then, I have actively explored various areas of tech — from developing Discord bots and Minecraft plugins to managing servers and participating in competitive CTFs. I thrive on building creative, practical solutions and continuously expanding my knowledge. Currently, I am focused on crafting innovative projects across platforms while preparing for the JEE examination.

ACHIEVEMENTS

- 9th place nationally in InCTFj - India's biggest CTF event by Team bi0s.
- 7th place internationally in VishwaCTF.
- Winner of multiple medals in Olympiads.
- Earned cash prizes and goodies in several CTFs.
- Participated in over 200+ CTF events.

PROJECTS

- Organizer of OSCTF 2024 with 1700+ participants and 23.20 CTFtime rating: https://ctftime.org/event/2416
- Created multiple Minecraft plugins for private server "Capital Realm"
- Developing several Discord bots for specific purposes (available on my GitHub)
